

Project meeting in Levice

In March 12th – 16th, 2014 our school hosted the meeting of European foreign partners. 19 teachers and 30 students from Germany, Portugal, Hungary, Slovenia, Italy, Turkey took part in the meeting within the CREA (Comenius) project.

The work programme was really rich and diversified. The meeting was opened with the „International Fair“ when the students introduced typical products from their country, prepared degustations and offered promotion materials. Later student's presentations and videos related to „7 Wonders of My Region“ followed when students showed us notable sights and attractions in their surroundings. We sometimes were really surprised how many curiosities can be found around us.

The workshops were organized separately for students and teachers as well. The teachers evaluated the project work that was carried out, talked about the last project meeting organization in Turkey and the Final report preparation. They also discussed the idea to submit a new partnership project within the new Call in the new Erasmus+ Programme under KA2. Our teachers introduced the way we improve our students' entrepreneurial competences within the programmes Business in Tourism and Applied Economics which impressed our partners very much.

Student's workshops were aimed at development of creativity, soft skills and self-expression. International teams created a common picture that will become the permanent school decoration and will commemorate the pleasant moments spend together with foreign friends. The students were later dealing with their age typical topic – conflicts with peers and other people, prevention, peermediation.

Spare time activities enabled the participants to get to know the most interesting places in our region. We introduced them the manor house in Svätý Anton, historical Banská Štiavnica with the Bethlehem, romantic Bojnice chateau. We did not forget to present the regional gastronomy with our typical meals.

The project meeting was carried out in a nice and friendly atmosphere thanks to beautiful spring weather, too. We hope that the participants will keep only nice memories about our school, town Levice, Slovakia in their minds.

Ing. Alena Krčíková
project manager
